

Bagging Systems

**MECHANICAL  
BAG CLAMP**

**Bag Clamp with adjustable clamping force**

**Mounted on a bag valve  
(open mouth bags)**

**Mechanical bag clamp for accurate and dust free mounting of bags on bagging and dosing systems or filtration units**

Our bag clamps are mechanical one hand operated clamps. The bag clamp is special developed for mounting paper or plastic bags, big-bags or filtration bags on product feeding pipes.

These product feeding pipes can be for bagging systems, dosing systems, filtration units, etc.

The bag clamps are manufactured for every requested pipe diameter. The robust clamps are standard manufactured in Stainless Steel.

The bag clamps ensure a quick, save and fast mounting of any open mouth bag. The clamping mechanism is equipped with a force adjustable spring and a grip inliner.

The bag clamps are standard delivered with a bracket for a bolted connection to the product pipe. Other brackets on request.

**TECHNICAL DATA:**

- Robust construction
- Available for product pipes diameters from 150 to 1000 mm. (*other diameters on request*)
- Standard in Stainless Steel (SS 316 – mat.1.4571)
- Special designed one hand opening and closing mechanism with maximum accessibility
- Adjustable clamping force (by solid spring)
- Size adjustable with +/- 10 mm.
- Inliner with heavy duty grip for perfect firm, sure and dustfree bag clamping
- Easy mounting with standard bracket (Customized mounting plates available on request)
